

LENOIR – 07/31/2020

CNC Tools Development and EDM & ZOLLER Technical Process Manager

Job Duties

Analyze status, operating capabilities and readiness for installation of all EDM machines. Oversee installation of new technology and tools in ADI USA's machines and analyze all problems related to design, installation, compatibility. Ensure optimal operation and stream the workflow. Investigate all performance irregularities or machine stoppage, analyze cause(s), and recommend remedial steps with US staff or Italian staff. Oversee all repair work. Provide information and requests received from customers to design engineers in Italy to confirm modifications to machines, tools or technology, and to meet client demands and market conditions. Supervise work of existing US staff and recommend re-training or other steps necessary to provide optimal service to customers. Coordinate with design and production departments in Italy, and with production department in US, to ensure ADI US and ADI Italy production systems operate with minimal variation. Transfer data from Zoller machine to all CNC Stone machine proprietary language. Maintain the data base aligned (US and Italian). Propose and master improvements on the Zoller machines capabilities in relation to various Diamond tools requirements.

Minimum Qualifications

- 3 years as production manager in marble and granite company
- 3 years experience using and/or programming CNC machines
- 1 year experience in EDM CNC Diamond tools production
- 1 year experience in using Zoller pre-setting machines

The above experience can be obtained in one or more jobs

Additional Requirements:

- Valid driver's licence
- Willing and able to travel to Canada and Europe few times a year (2-5) for max 15 day a trip (normally one week per trip)
- Willing to travel within the US (for visiting end customers or major shows) 2 or 5 times a year for few days each trip
